WORK EXPERIENCE

Associate Software Engineer

AUG 2022- 2023

Prodapt, Bangalore, India

- Developed robust, scalable microservices using **Node.js**, **Spring Boot**, and **ReactJS** to support telecom order processing systems for enterprise clients.
- Built and integrated **RESTful APIs** for managing customer and order data; connected these services with responsive **ReactJS** front-end components using **Redux** for efficient state management.
- Designed and deployed a serverless **CSV data ingestion and visualization pipeline** using **AWS Glue**, **S3**, **IAM**, and **Quicksight**, enabling automated reporting for internal operations.
- Investigated and resolved production issues by tracing order flows across **Siebel**, **OSM**, and **AIA Composites** using tools such as **SOAP UI**, **Snapshot**, **SQL Developer**, and **NPG**, improving resolution time by 40%.
- Collaborated across cross-functional teams in Agile sprints, contributing to backlog refinement, sprint reviews, and cross-team integrations to ensure high-quality feature delivery.
- Delivered clean, reliable code by writing unit and integration tests using **JUnit**, **TestNG**, **Jest**, and **Enzyme**, maintaining consistent test coverage above 90%.
- Used **Git** and **GitHub** for version control, managing feature branches and participating in peer reviews to ensure modular and maintainable codebases.

Software Developer

2023-present

- Delivered multiple backend service modules using **Node.js**, **Express.js**, and **MongoDB** to support business automation workflows and internal admin dashboards.
- Built scalable, secure **REST APIs** for data management, user authentication, and reporting — improving endpoint response times by 25% through efficient caching and query optimization.
- Led the migration to **MongoDB Atlas**, designing document schemas and aggregation pipelines to streamline customer data handling and analytics.
- Contributed to breaking down monolithic applications into microservices, significantly enhancing system scalability and reducing deployment risk.
- Worked closely with frontend developers to integrate APIs with **Angular** and legacy **jQuery**-based UIs, ensuring consistent data flow and smoother user interactions.
- Participated throughout the Agile cycle — from refining requirements to delivering sprint goals — while using tools like **Postman**, **Swagger**, and **Jira** for API testing and progress tracking.

SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, Perl
Frontend: ReactJS, Redux, Angular, JQuery, Webpack
Backend: Spring Boot, Node.js, Express.js, RESTful APIs
Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, Glue, Quicksight), Git, GitHub Actions
Databases: Oracle, MySQL, PostgreSQL, MongoDB
Tools & Testing: Notepad++, SOAP UI, Jest, Enzyme, Postman, JUnit, TestNG
Concepts: Microservices, CI/CD, MVC, OOP, Agile, System Design, Data Structures & Algorithms

EDUCATION

GL Bajaj Group of Institution, Mathura
B.Tech , Computer Science

AUG 2018-JUN2022
CGPA:7.3
